The column headed "NY" indicates the number of years over which data has been used

Temperature, frost, evaporation and wind run averages and extremes calculated from all available data recorded at University of New England/ Bureau of Meteorology weather station at East Armidale (1981-2022), elevation 987 metres

Sunshine data from University of New England weather station at Laureldale (1977-93), North Armidale, elevation 1060 metres

All other data including rainfall from composite records at Armidale Post Office (1857-1965), Radio Station 2AD (1965-1997), elevation 980 metres, and East Armidale (from 1997).
